

# ACROSS THE SLOVAK SPIRITS

## Gin Gin

1st Slovak premium gin delicate in its taste and beautiful from the outside. Gin Gin is homemade from hand-picked junipers, wild thyme growing in pure nature, elderberry, the flower of lime-tree, quince and multiple other components. You can create a perfect combination of Gin Gin with tonic in modern or classic drinks. The design of the bottle shows an elegant combination of Slovak blueprint with a strong tradition of gold and silver mining work in Slovakia.

## Juniperus

Geneva JUNIPERUS Pure Distilled was created by a specific method in a two-stage distillation of fermented yeast from grounded junipers. As the only premium geneva of its kind, it brings to the market pure vivid taste of a noble distillate produced from 8000 junipers per bottle. It presents an original delight also for the most demanding taste buds.

## Nestville whiskey

One of the most essential factors that led to the production of Whisky Nestville was an analysis of high-quality pure water, showing that it is full of minerals extremely suitable for whiskey production. Based on the geological research it was discovered that the water we usually use runs through the quaternary sediments of the Zuberec and Bielopotok layers. The distillery factory offers today besides the basic blended whiskey also flavored whiskey, Single Malt whiskey, or the 9yo Master Blender edition.

## Frndžalica

The mythical drink of the famous Pacha and his companions revives. Pacho Matrtaj Frndžalica is made by classic distillation in the womb of Slovak nature. The purest Slovak raw materials are filled with high energy. The delicious Slovak spirit matures in the oak casks for up to 2 years. You will be captivated by the chocolate and vanilla tones with the traces of apples. This magical drink will enchant you by its creamy taste with a touch of fine spices. Frndžalica gets its beautiful color naturally from leaching in the oak wood.

# SLOVAK FRUIT SPIRITS

## Marsen

The distillates Marsen have an exceptional position. Beside the fact that they belong to the category of real fruit distillates, they also be proudly called „varied“. Meaning that they are made without any artificial aromas, colorants or other substances. When it comes to fruit we do not only distinguish the types of fruit but also its varieties. From pear, we can make for example four types of distilleries - Williams, Conference, Durandeu or Autumm.

## St. Nicolaus premium distilleries

The Slovak brand with the distillery located in our neighbors in South of Czech Republic. Only the best varieties of fruit are carefully chosen for the production of these distillates, mainly from the river basin of Tisza and Szamos. The floodplains in this region are rich in nutrients and, in combination with an optimal number of rainfall and sunny days, ideally nourish fruit trees that give birth to fruit with a very rich flavor.

## BVD distillery

Bird Valley Distillery was established in 2010 with the goal of satisfying the ever-growing demand for 100% fruit spirits. It took several long months to find the most appropriate fruit varieties, methods of manufacturing and development of original technological processes to ensure a unique place in the market. They were the first to come to the market with Geneva 100% distillate.

## Fine Destilery

The distillery from Nitra region has been producing quality fruit spirits since 1995 and is one of the leading Slovak brands. The raw materials for its production originate exclusively in Slovakia and the bottle has a unique modern design thanks to the glass-painted label.
